

CONTENT DELIVERY SYSTEM

Rapidly growing and changing content owners need fast and reliable access to a portfolio of products and services tailored to meet their unique delivery needs.

The BandCon Content Delivery System™ (CDS) offers a full suite of services that can be scaled quickly to meet your evolving content-space demands. We offer you the flexibility to move from service to service as needed, with no contractual or cost constraints.

BandCon's CDS™ offers all of the internet infrastructure products needed to support today's media rich content requirements including:

- IP Transit to connect your server to the internet
- Transport services to connect your geographically distributed servers with point to point transport services
- Colocation services to help you expand your footprint worldwide in Tier 1, carrier neutral facilities
- CDN services to help you deliver your content over a best of breed platform that fits your specific application, audience and needs
- Peering to major ISP's to reduce costs and increase efficiency

BandCon's CDS™ services are available on a month-to-month basis and can be purchased á la carte, or bundled to meet your specific requirements. Our "pay as you grow" approach offers the ultimate in scalability for growth while minimizing your infrastructure investment.
