

COLOCATION

BandCon offers you with physical space, security, redundant power, technical support and infrastructure flexibility to meet your specific networking requirements. BandCon completely embraces carrier neutral colocation, so our facilities offer you direct access to other carriers to decrease your costs, increase your network efficiency and enhance your ability to peer with as many carriers as possible!

We provide carrier-grade colocation space in over 250 facilities throughout the US, Asia and Europe. All built according to uniform environmental and security standards that deliver key physical benefits.

We offer:

Security

- Multi-layer security control procedures, biometric palm readers and 24X7 closed-circuit video and alarm monitoring

Power

- Uninterruptible redundant AC and DC power solutions that are flexible and upgradable to meet all types of needs.

Cooling

- HVAC redundant design with air distribution under raised floor for maximum temperature control

Fire Suppression

- Smoke detection system above and below raised floor: double-interlock, pre-action, dry-pipe fire suppression

Overhead Cable Management and Ladder Racking

- Provides easy access to all cabling while deterring obstructions from under the raised flooring

In addition to our 24X7 network operation center, we provide "Remote Hands" support through our BandCon Tech Service group at every facility. This pay-by-the-hour service taps BandCon's field services organization and NOC services to respond immediately to the situation, whenever and wherever it occurs.

Features

Dedicated server hosting in custom built private cages

Access to over 250 facilities throughout the US, Asia and Europe

365X24X7 Remote Hands support
